

Transport + Mobility + Planning
Refined

Welcome to **TMP** Consult

Welcome to **TMP Consult**: Transport + Mobility + Planning

TMP Consult was founded to bring a truly independent voice to the transport and mobility planning market in the Middle East, building on more than 30 years of global experience and 18 years here in the region

Our philosophy is simple: provide objective, world-class mobility advice that serves the best interests of our clients. Being independent means we recommend the most suitable approaches and solutions for each project with impartiality and integrity

We are proud to support governments, developers, and transit providers across the region with expert guidance spanning strategy, impact assessment, modelling, and design

Our clients are our partners. We look forward to working with you to deliver efficient, sustainable, and future-ready mobility solutions

Martin Tillman, Founder and Managing Director, **TMP** Consult

TMP Consult Projects – Nakheel Cycle Study

هيئة رأس الخيمة للمواصلات
RAK TRANSPORT AUTHORITY

TMP Consult has been appointed in partnership with Otak International to provide transport planning expertise for the Ras Al Khaimah Transport Authority's (RAKTA) Nakheel Cycle Network Study.

The project focuses on developing a comprehensive cycling plan for the Nakheel area encompassing route alignment, infrastructure typologies, safety enhancements, and integration with wider urban mobility systems.

TMP is leading on network planning, demand analysis, and policy alignment to ensure the proposed cycling infrastructure is both context-sensitive and future-ready.

The study aims to promote sustainable and healthy travel options, reduce car dependency, and align with RAK's broader goals for liveability and decarbonisation.

TMP Consult Projects – Public Transport Routes and Patronage

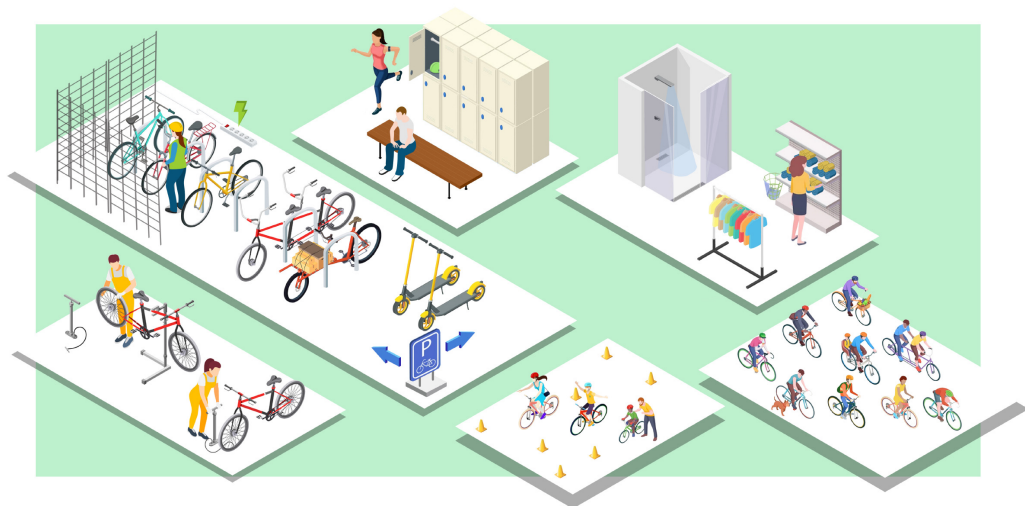

TMP Consult has been engaged by WeMove to provide specialist advisory and modelling support for a new Demand-Responsive Transit (DRT) service in the UAE.

The study involves assessing fixed-route bus performance, optimising service coverage using dynamic routing, and advising on zone selection for DRT expansion. TMP's role includes transport demand analysis, service area design, and high-level network modelling to ensure operational efficiency and passenger convenience.

TMP is delivering a multi-phase scope including baseline review, route and zone rationalisation, and implementation guidance. The project supports WeMove's ambitions to scale smart, flexible transport solutions that bridge first/last-mile gaps and improve access in dense urban environments.

TMP Consult Projects – ModeScore Certifications

TMP Consult is the exclusive UAE partner for ModeScore, a pioneering transport and mobility rating system that evaluates how well developments support sustainable, accessible, and future-ready travel.

ModeScore assesses a project's performance across key pillars such as walkability, public transport access, cycling provision, shared mobility, EV-readiness, and integration with broader urban networks.

TMP provides ModeScore audits, certifications, and improvement plans for developers, consultants, and city authorities. Recent assignments include ModeScore assessments for logistics, retail, and master-planned developments.

This partnership reinforces TMP's position at the forefront of evidence-led, decarbonised transport planning in the Gulf.
